

PREVENTING AMPUTATION THROUGH HOMOEOPATHY

A case presentation was done by post graduate student (MD part –I) Dr.Poojitha.Ankerela, Department of Repertory, under the guidance of Dr.Sangeeta.C.Belagavimath treated a case of **Diabetic wet Gangrene** with Homoeopathic medicine within a short period of time.

The case was of a 70 year old female with long standing history of Diabetes mellitus, Hypertension and Bronchial asthma. History of amputation of left big toe was done 3 years back due to diabetic gangrene. Recently the patient developed diabetic wet gangrene of right leg and foot. She was prescribed Arsenic Album 30, 5 doses and improvement had started from the 2nd day.

A miraculous result was achieved by student of A.M.Shaikh Homoeopathic Medical college.

Before Treatment: 09-07-2021

After Treatment: 27-10-21
