

BELGAUM INSTITUTE OF MANAGEMENT STUDIES DEGREE COLLEGE (BCA DEPT) ORGANIZED A SESSION ON “EDUCATION ABROAD” FOR BCA STUDENTS.

The main purpose of this session was to provide information on wider variety of courses, some also including **research options and skill-based training for students**. This helps expand student’s horizons and opens up a world of new educational opportunities. Not only this, certain programs abroad also allow students to take different courses at the same time.

The resource person **Mr. Nitin Mirajkar Green Line Education Consultants Pvt. Ltd.** briefed about Abroad Education, its importance and core services. Admission at Top Universities, Mock Interview sessions, Food and Accommodations, Program selection, Visa Processing, Scholarship facilities etc.,

He highlighted the key points of abroad education. Experience of living internationally goes down well with employers, showing you have experience dealing with people from different cultures, plus a higher level of adaptability. If you can explore a new country at the same time as picking up skills to gain a decent graduate job, then that’s pretty good going.

Your exposure to different types of people will not only help you to develop your skills, but it will also give you a more in-depth knowledge of others, particularly those from different cultures.

Often those studying abroad will experience a completely new way of teaching. This can be daunting, but it will also open your mind to new ways of learning.

It’s easy to accept your own culture as absolute, but living in another country can help inform your point of view on your home culture, allowing you to develop your own views rather than simply accepting those defined by where you happen to come from.
