

INTER-DEPARTMENTAL INTEGRATION OF MEDICINE AND ORGANON DEPARTMENT

Title – Homoeopathic approach towards Acute Kidney Disease (AKD)

Purpose/Need for Integration :An attempt to study and witness recovery or cure through Homoeopathy in a case of AKD where in PG participants dips deeper into the case study while understanding the disease pathogenesis and the dynamic pathogenesis of the disturbed life force.

Objective – Problem based Learning of Homoeopathic approach in AKD cases.

Methodology - Problem based learning (PBL) where in a case scenario of Kidney disease is the problem for which the participants formulate answers as per their understanding and explain in form of presentation. In the team we have a leader i.e Dr. Manasa and a scribe Dr. Saileen. The sessions started by narrating a case scenario of Kidney disease by Dr. Nuti with the questions that the participants had to answer during the presentation.

From Medicine Dept PG student Dr Muhilan and Dr Laxmi spoke on classification, pathophysiology, Biochemistry changes of electrolytes in the given case scenario. The prognosis and management was discussed.

From Organon Dept PG student Dr Krishna spoke on Homoeopathic approach by classifying disease and referencing the Homeopathic management by quoting the aphorisms, followed by Dr. Nuti who spoke on miasmatic background as a base to select similimum along with assessing the follow up based on dynamic pathology involved in AKD. Dr Saileen spoke on the posology that needs to be followed in Acute kidney disease. Dr Farhan spoke on scope and limitations of Homeopathy in Acute kidney disease. At the end Dr. Manasa highlighted on recent articles and case report of AKD with Homoeopathy.

At the end of the session questions written by the scribe was read by leader and answers discussed by all team members.
