

BELGAUM INSTITUTE OF MANAGEMENT STUDIES DEGREE COLLEGE
WITNESSED “ZERO SHADOW DAY” @ SGI

Zero Shadow Day is a special day when the sun aligns directly overhead, causing objects and people to cast no shadows on the ground. This phenomenon occurs twice a year, and it's like a magical moment when the sun is at its highest point in the sky.

The Earth is tilted on its axis, which is why we have different seasons. On Zero Shadow Day, the sun is directly above the Earth's equator, and its rays fall straight down, creating no shadows. This happens because of the angle at which sunlight reaches us.

In 2023, Zero Shadow Day is happened on August 18. It was occur around 12:24 PM. This event is unique to places between the Tropic of Cancer and the Tropic of Capricorn, which are imaginary lines around the Earth.

All BIMD Students were present @ Shaikh Campus Ground at 12:00 pm. Students and witnessed the day.

All the faculty members of BIMD were present for this event. Miss. Uzma Mulla informed how the observers notice their shadows gradually fading away. She informed unique occurrence where the Sun does not cast a shadow of an object at noon, the same when the sun is exactly at its peak position. All the students participated with full enthusiasm.
